

## DALBY MARKET REPORT - Wednesday 3rd August 2022

Dalby agents yarded a combined total of 3064 head for our weekly sale 3-8-22. Export kill prices lifted across the board today with three Southern processors operating in the market alongside our usual processors on Heavy steers and Cows. Prices lifted on Heavy steers by 10-25- cents while cows saw prices 15 - 25 cents stronger. Both export and trade Feeder cattle saw little to no change in price. Bulls continue to struggle to hold ground with one major processor still not in attendance. Restocker cattle, pending Quality held ground with isolated steer prices 10-20 cents stronger. Secondary cattle lost ground with very limited competition on lesser types.

Cows & calves sold to a firm market along with PTIC Cows seeing strong competition. All in all the market appears to be stabilising with some good opportunity for restockers to be able to get back into the market and offset some of the dearer prices paid earlier in the season.

## **NEXT SALE WEDNESDAY 10TH AUGUST | SELLING IN 3RD POSITION**
