

DALBY MARKET REPORT - Wednesday 28th September 2022

Combined agents yarded 3436 cattle for this weeks Dalby sale.

The market was firm to dearer across the board with plenty of good lines of cattle coming to hand. Heavy kill cows were dearer with cows topping over 400c/kg as were heavy bulls which also topped over 400c/kg. An exceptional line of well finished bullocks came to hand and sold very well topping at 430c/kg. Feeder steers to suit the 100-day export market reached new heights with sales to 530 c/kg with the majority being from 490-500c/kg. Both trade feeder heifers and steers sold to a competitive panel of buyers.

A mixed line of second round cattle came to hand however sold to a very solid market. Heavier steers returning to the paddock continue to be a sort after commodity selling from 550-620c/kg with the lighter end steers selling from 650-750c/kg with a fair sample making 670c/kg. Heifers were quite similar, heavier British and Euro bred heifers that could meet feedlot weights sold to 550c/kg with lighter backgrounder heifers selling from 530-580c/kg. Overall, with positive weather conditions on the horizon and consistent rainfall the market looks to be continuing to strengthen week to week.
